

THE DIGITAL CURRENCY

WHERE THE COINS ARE CREATED BY
PLANTING TREES

Accept Forestcoin

Forestcoin is a currency where the coins are created by planting trees.

Forestcoin is created when users use the Forestcoin app to take before and after photos of the planting of a tree. Tree plantings are assessed by other Forestcoin users who vote to approve it. After three approval votes the Forestcoin is created and issued to the tree planter, and can then be traded, sold or used for purchases.

Forestcoin captures the hearts and minds of people that are concerned about climate change, and appeals to businesses that want to associate their brand with the currency that monetizes tree planting.

With trees planted in 23 countries and growing, Forestcoin is the payment choice of users worldwide.
